The A606 master gas valve box is designed for use in commercial applications. This box is fully recessed and constructed of heavy gauge, type 304, stainless steel. The interior of this box is bead blasted to provide a clean interior. The mounting flange and door are polished to a satin finish. The door is supplied with a 3/16" thick lexan window. The door is connected using stainless steel hinges. This unit is supplied with a cylinder lock with two keys and a quarter turn latch. This unit is provided with a logo strip "Master Gas Valve" which is black Bakelite tag with 1/2" high white letters and self adhesive. Logo is sent loose for installation in the field. Front door frame and door are removable for installation and have adjustment for various wall conditions. **Punchings, piping, fittings and gas valve(s) are provided by others.**
