► DESCRIPTION/SPECIFICATION

The 9311-1 triple station scrub sink is a surgeon scrub-up sink used in the health care industry. This sink is a wall mounted sink constructed of 14 gauge type 304 stainless steel. The unit is seamlessly welded to form a one-piece unit. The sinks front is sloped to minimize splashing and incorporates 3/4" radius corners for easy cleaning. The drain hole accepts a 1 1/2" drain and comes with a standard beehive strainer and p-trap. The unit is punched to accept a single hole 1 1/4" faucet. The interior is coated with a sound deadening, fire resistant material.

► INSTALLATION

This unit is mounted with a standard "Z" clip and four (4) additional mounting holes inside the cabinet securing the fixture to the wall. It has a removable front access panel which allows for easy mounting and maintenance.
